

ING NEW ING BUILDING IN LOUVAIN-LA-NEUVE READY FOR HYBRID WORKING

ING decided to centralize its Walloon head office in Louvain-la-Neuve. For this, the bank has opted for a smart building with a surface area of approximately 10,000 m² over 4 floors. The building consists of a central, bright atrium and an impressive garden labeled Réseau Nature. ING aims for sustainable mobility, with an infrastructure for bicycles and electric cars in the underground parking garage with 350 parking spaces. A good example of the bank's social commitment. BIS|Econocom Belux was selected to equip all floors with state-of-the-art AV equipment.

THE OBJECTIVE

- Enable hybrid working for all employees
- Maximize uniformity in all room types
- Educate the ING workforce with trainings and adoption sessions
- Follow the ambitious BREEAM environmental guidelines for the entire AV installation

WHY BISIECONOCOM?

- We assisted ING with tender design & project approach from the very start
- Healthy price/performance ratio of all involved AV systems
- Our flexibility in installation & support
- Vendor agnostic approach, we push MTR solutions, not brands!
- Strong execution plan
